

# Cover Sheet/Check List for TEAM 1391 (+) and PCEs

Project No: \_\_\_\_\_

Title: **“SAMPLE MCON PROJECT”**

Location: \_\_\_\_\_

**OPNAV FORMAT (revised 5 May 2001)**

**Program Year**

☐ FY\_\_ **1391(+)**

☐ FY\_\_ **PCE**

## A. Major Project Elements Confirmed:

Confirmed	Not Required	Working Issue	
			(1391 Block)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1. Budget cost certification (9)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	2. Planning Consistent with Master Plan and or Base/Regional Development (10)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	3. Scope (based on FPDs and P-80 calculations)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	4. Operational Requirement documented (11)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	5. Current situation (11)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	6. Impact if not provided (11)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	7. Best Alternative supported by Economic Analysis (11)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	8. Siting (incl. AICUZ, airfield safety clearances, EMR, wetlands, explosive safety certification, fire protection certification) (12)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	9. Soils, foundation, & seismic considerations (12)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	10. Systems safety (NAVOSH, etc.) (12)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	11. Utility & other infrastructure support (12)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	12. Operating/construction permits identified (12)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	13. Special approvals (include Historical Preservation Section 106 and BEAP) (12)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	14. Feasibility/Constructibility in FY (12)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	15. Environmental (air/water, hazmat, etc.) issues addressed (12)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	16. NEPA doc's and mitigation issues identified (12)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	17. Facility Sustainable Development (12)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	18. Equipment from other appropriations (12)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	19. Milestones (Project Schedule) (12)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	20. Anti-terrorism/Force Protection (12)

## B. Remarks:

## C. Attachments:

- ☐ 1. Budget Estimate Summary Sheet
- ☐ 2. Economic Analysis
- ☐ 3. Site Plan
- ☐ 4. Facility Planning Document(s)/P-80 Calculations
- ☐ 5. R-19 (Bachelor Housing Survey)
- ☐ 6. Notice of Violation (NOV)
- ☐ 7. Summary (associate Facility Sustainable Development)
- ☐ 8. Other

## D. Project Team Members (Name/Tel):

Activity: \_\_\_\_\_  
Activity: \_\_\_\_\_  
EFD/EFA: \_\_\_\_\_  
EFD/EFA: \_\_\_\_\_  
Region/Warfare Cntr: \_\_\_\_\_  
Instal Mgt Claimant: \_\_\_\_\_  
NAVFAC: \_\_\_\_\_  
Other: \_\_\_\_\_

## E. Team Meeting Date(s):

☐ On-site ☐ Conference call ☐ VTC

## F. Signatures:

Activity CO (Meets Military Requirements) Signature/Date

EFD/EFA Cost Engr (Cost Certification) Signature/Date  
(Anti-terrorism Force Protection Costs Incl)

EFD CIBL (Endorsement) Signature/Date

1. Component NAVY	<b>FY 2003 MILITARY CONSTRUCTION PROGRAM</b>				2. Date	
3. Installation and Location/UIC: N62588 NAVAL SUPPORT ACTIVITY NAPLES, ITALY				4. Project Title AIR PASSENGER TERMINAL		
5. Program Element	6. Category Code 141.11	7. Project Number P-196	8. Project Cost (\$000) 8,500			

The first line in Block 9 is always the title of the project, not "Primary Facilities".

Provide details in Block 10.

Per OSD budget guidance, "use a contingency rate that will provide sufficient funding to ensure unimpeded execution." For the time being we will continue to use 5 percent. This may change in the future.

9. COST ESTIMATES						
Item	U/M	Quantity	Unit Cost	Cost (\$000)		
AIR PASSENGER TERMINAL	m2	3,960	-	6,170		
TERMINAL	m2	3,240	1,914.00	(4,000)		
AIR OPERATIONS BUILDING	m2	720	2,031.00	(1,230)		
AIRCRAFT WASH RACK	LS	-	-	(160)		
BUILT-IN EQUIPMENT	LS	-	-	(400)		
INFORMATION SYSTEMS	LS	-	-	(30)		
TECHNICAL OPERATING MANUALS	LS	-	-	(110)		
ANTI-TERRORISM/FORCE PROTECTION	LS	-	-	(240)		
SUPPORTING FACILITIES	-	-	-	1,160		
SPECIAL CONSTRUCTION FEATURES	LS	-	-	(400)		
ELECTRICAL UTILITIES	LS	-	-	(70)		
MECHANICAL UTILITIES	LS	-	-	(70)		
PAVING AND SITE IMPROVEMENT	LS	-	-	(280)		
FACILITY SUSTAINABLE DEVELOPMENT	LS	-	-	(200)		
ANTI-TERRORISM/FORCE PROTECTION	LS	-	-	(70)		
DEMOLITION	LS	-	-	(70)		
SUBTOTAL	-	-	-	7,330		
CONTINGENCY (5.0%)	-	-	-	370		
TOTAL CONTRACT COST	-	-	-	7,700		
SUPERVISION, INSPECTION, & OVERHEAD (6.5%)	-	-	-	500		
SUBTOTAL	-	-	-	8,200		
DESIGN BUILD DESIGN COST (4.0%)	-	-	-	290		
TOTAL REQUEST	-	-	-	8,490		
EQUIPMENT FROM OTHER APPROPRIATIONS	-	-	-	(600)		

Guidance Unit Cost Analysis

Category Code	U/M	Guidance Cost	Guidance Size	Project Scope	Size Factor	Area Cost Factor	Unit Cost
141-11, AIR PSNGER TERM	m2	1,517	930	3,240	0.97	1.30	1,914.09
141-40, AIR OPS BLDG	m2	1,517	930	720	1.03	1.30	2,031.42

Guidance cost analysis should be done for every applicable Primary Facility type.

For facility types with OSD guidance, it is important to fully justify unit costs which exceed guidance. Exceeding guidance is difficult to justify in the budget process and should be avoided whenever possible.

Use most recently published OSD guidance. If guidance is not available, develop a rationale for unit cost used.

10. Description of Proposed Construction

Two story with basement, steel-frame building, insulated metal wall panels, concrete foundation and structural floor, built-up roof on insulated metal decking and steel truss; air passenger processing, waiting and eating areas; admin space; aircraft parking control facility; emergency equipment storage area; vehicle access to basement storage; entrance canopy; fire protection system, information systems, elevator, baggage equipment; utilities and mechanical systems (HVAC); demolition of two buildings; relocation of

**Block 10 Notes:**

The information in Blocks 9 and 10 control the scope of the project and should be tied together. Block 10 description should include such things as:

- Type of work (i.e. alteration, modernization, new construction, etc.)
- The number of stories of the building
- Construction materials to be used for the foundation, floors, frame, walls, and roof; pilings or special foundation features. (this is necessary for budget book preparation)
- Provide building numbers and floor areas for buildings to be demolished. Ensure that these facilities have met approval requirements such as National Historic Preservation Act, GSA permit(s), and McKinney Act screening.

1. Component NAVY	<b>FY 2003 MILITARY CONSTRUCTION PROGRAM</b>	2. Date																					
3. Installation and Location/UIC: N62588 NAVAL SUPPORT ACTIVITY NAPLES, ITALY																							
4. Project Title AIR PASSENGER TERMINAL		7. Project Number P-196																					
<p>(...continued)</p> <p>aircraft wash rack and hazardous material pad. Facility will be constructed to seismic zone three. OMSI manuals (dual language) will be provided. All materials used for aircraft wash rack construction shall be non-ferrous because aircraft compasses are calibrated while on the wash rack. The project will demolish Buildings #425 (1,746 m2) &amp; #487 (400 m2).</p>																							
<p>11. Requirement:</p> <p><b>FACILITY PLANNING DATA</b></p> <table style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Cat Code</th> <th style="text-align: center;">Requirement</th> <th style="text-align: center;">UM</th> <th style="text-align: center;">Adequate</th> <th style="text-align: center;">Substandard</th> <th style="text-align: center;">Inadequate</th> <th style="text-align: center;">Deficiency/Surplus</th> </tr> </thead> <tbody> <tr> <td>141.11 - Air Passenger Terminal</td> <td style="text-align: center;">3,240</td> <td style="text-align: center;">m2</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> <td style="text-align: center;">1,746</td> <td style="text-align: center;">3,240</td> </tr> <tr> <td>141.40 - Air Operations Building</td> <td style="text-align: center;">720</td> <td style="text-align: center;">m2</td> <td style="text-align: center;">0</td> <td style="text-align: center;">0</td> <td style="text-align: center;">400</td> <td style="text-align: center;">720</td> </tr> </tbody> </table> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Requirement (Block 11) General Notes) -</b></p> <ul style="list-style-type: none"> <li>This the most vital part of the 1391 document and contains the information that determines the success or failure of the project. It is the primary justification data used at the review levels of CNO, the Navy Comptroller, DoD Comptroller, OMB, and Congress.</li> <li>Since the reviewer's understanding of the project is gained through the material provided here, it should be written clearly, concisely, and convincingly. Leave no doubt in the reviewer's mind of the necessity for the project.</li> <li>There is the misconception that a 1391 should be concise and a one paragraph statements are all the information that should be provided. This is not always the case. Most projects require a detailed description of the existing situation and operational processes in the facility in order to understand the problems the project will correct. This information should be explained here.</li> <li>Consider other factors worth mentioning that may also help sell the project (i.e. environmental considerations, benefits to personnel and/or community, consolidation of functions, etc).</li> <li>For the most part, the people reviewing this 1391 justification are non-technical analysts and may not be familiar with your activity or your operations. Therefore, the requirement block should be written so anyone can understand it and see the need for the project. Avoid the use of technical terms and acronyms. Spell out all acronyms at least the first time used.</li> </ul> </div> <div style="margin-top: 10px;"> <p><b>Scope:</b> The project scope was derived using Air Force Manual 86-2 for category code 141-11 Air Passenger Terminal and NAVFAC P-80 (Ch 3 of Mar 95) for category code 141-40 Air Operations Building. 141-11: Air Passenger Terminal is sized based on peak hour passenger load which is calculated using actual passenger through-put. The peak hour passenger load is 300 PN. 141-40: Air Operations Building size is based on the fact that NSA Naples is an Air Facility, which allows up to 907m2. In this case only 720m2 is required. Project also demolishes Building #425 (1,746 m2) and Building #487 (400 m2). Detailed P-80 calculations on how the scope was derived are attached.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Scope:</b> Provide a summary of NAVFAC P-80 calculations, or other documents (attachments) used to calculate scope. If requirement is based on detailed operational requirements, summarize how the scope was derived based on the quantitative data. For each category code in the project scope include the following:</p> <ul style="list-style-type: none"> <li>Category code number and a brief description of the facility</li> <li>Reference NAVFAC P-80 criteria or document used to calculate scope. If P-80 is not used, provide a clear rationale how the scope was produced.</li> <li>Include base loading data (e.g. number of ships, aircraft, people, or equipment)</li> </ul> </div> <div style="margin-top: 10px;"> <p><b>PROJECT:</b> This project constructs a new air passenger terminal and airfield operations facility. (Current Mission)</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Project:</b></p> <ul style="list-style-type: none"> <li>The Project section usually is one hard hitting opening statement which summarizes the "what" of the project. No other sentences are needed unless they really add something that needs to be highlighted up front.</li> <li>"(New Mission)" or "(Current Mission)" is indicated in parentheses at the end of this paragraph.</li> </ul> </div> </div> </div>			Cat Code	Requirement	UM	Adequate	Substandard	Inadequate	Deficiency/Surplus	141.11 - Air Passenger Terminal	3,240	m2	0	0	1,746	3,240	141.40 - Air Operations Building	720	m2	0	0	400	720

141.11 - Air Passenger Terminal	3,240	m2	0	0	1,746	3,240																	
141.40 - Air Operations Building	720	m2	0	0	400	720																	

1. Component NAVY	<b>FY 2003 MILITARY CONSTRUCTION PROGRAM</b>	2. Date
3. Installation and Location/UIC: N62588 NAVAL SUPPORT ACTIVITY NAPLES, ITALY		
4. Project Title AIR PASSENGER TERMINAL		7. Project Number P-196
<p>(...continued)</p> <p><b>REQUIREMENT:</b> Adequate and efficiently configured facilities to provide an air passenger terminal and to consolidate air operations functions. Naval Support Activity Naples is the command center for all Naval operations in the Mediterranean. It is the host activity for several commands and provides mission support for U.S. and allied forces in the region. This requires an efficient air terminal capable of handling passenger traffic generated by over 8,000 DOD and civilian personnel stationed in Naples and central Italy as well as the 5,000 to 10,000 personnel aboard ships of the U.S. 6<sup>th</sup> Fleet.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Requirement:</b></p> <ul style="list-style-type: none"> <li>• The Requirement statements are vital for your project. The first sentence should state the real requirement up front: "Adequate facilities to accommodate ..." or "Adequate operations facilities for ..."</li> <li>• Follow with a background of your mission and operations and how they drive the requirement for this project.</li> <li>• Provide workloads, tasks and assignments, and functional operations necessary to make a clear analysis of the requirement. (i.e. quantified workload increases, state-of-the-art advances, personnel growth, and equipment delivery dates).</li> <li>• Assume the presentation leaves no pertinent questions unanswered.</li> <li>• Address if the project is being incremented. This block should leave no doubts in the reviewer's mind on the "why" the project if needed.</li> </ul> <p><b>Tips:</b></p> <ol style="list-style-type: none"> <li>1. Avoid extraneous material. The information should not be too technical to understand. On the other hand the information should not be too vague or general.</li> <li>2. The phrase "urgently needed for operational requirements" doesn't tell the reviewer anything. State the requirement that must be satisfied and explain how the project satisfies it.</li> </ol> </div> <p><b>CURRENT SITUATION:</b> The existing air passenger terminal at Capodichino is located in a 45 year old aircraft hangar (Building #405), which has been determined to be seismically unsafe and could collapse in a strong earthquake. In addition, it violates safety and fire protection regulations (NFPA 101). This inadequate and unsafe existing facility needs to be demolished to accommodate additional facilities to be moved from Agnano as part of the Naples Improvement Initiative (NII). This facility presently handles over 60,000 passengers annually and has a peak daily load of 300 passengers. These numbers are not expected to change since the Navy has no plans to significantly downsize any of its operations in Naples.</p> <p>Also, the downsizing of the Air Force locations throughout central Europe and the increase in operational tempo in the region, have resulted in Naples taking on a more significant role in the Air Mobility Command flight operations.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Current Situation:</b></p> <ul style="list-style-type: none"> <li>• The CURRENT SITUATION statement describes how and under what conditions the requirement is presently being met or not being met.</li> <li>• Discuss conditions of your facilities that do not allow you to meet or hinder your requirements.</li> <li>• Give details such as the age of existing buildings being used and describe congested spaces. Provide info on any hazardous conditions, environmental problems, safety citations and violations (please attach this type of documentation to your 1391+ submit), production-line shutdowns and delays, internal and external complaints, non-availability of resources, and utility outages. Comments should support the stated requirement.</li> </ul> <p><b>Tips:</b></p> <ol style="list-style-type: none"> <li>1. Words such as "inadequate", "uneconomical" and "unsatisfactory" contribute nothing to the justification unless fully explained. State precisely what the deficiencies are and why existing facilities cannot fill the need.</li> <li>2. If existing facilities are overloaded, deteriorated beyond economical repair, or outdated, don't use "clichés", instead provide specific information about these conditions.</li> <li>3. Include specific safety and environmental violations when these are cited (provide documentation to back up your statements).</li> </ol> </div>		

1. Component NAVY	<b>FY 2003 MILITARY CONSTRUCTION PROGRAM</b>	2. Date
3. Installation and Location/UIC: N62588 NAVAL SUPPORT ACTIVITY NAPLES, ITALY		
4. Project Title AIR PASSENGER TERMINAL		7. Project Number P-196
<p>(...continued)</p> <p>IMPACT IF NOT PROVIDED: The Navy will not be able to comply with the agreement signed with the Italian Government that calls for demolition of this unsafe facility. The dysfunctional facility will continue to create operational constraints and inefficient air passenger operations. Savings of \$250K/year expected in efficiencies will not be realized. Also, the existing operational hazards to passengers will continue along with the danger of personnel injury due to a building collapse in the event of an earthquake.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Impact If Not Provided:</b></p> <ul style="list-style-type: none"> <li>The IMPACT IF NOT PROVIDED block is not for repeating things that have been said before.</li> <li>It should not contain standard clichés like "will adversely affect morale and retention rate". What is needed here is a hard hitting impact summary describing the manner and extent of what will happen to and the effect on activity mission accomplishment and/or fleet readiness if this project is denied.</li> </ul> <p>Tips:</p> <ol style="list-style-type: none"> <li>Many of the people reviewing your project are budget analysts, use quantifiable dollar figures when possible (i.e. Additional cost of \$2M/year not budgeted will have to be spent until facility is provided or Savings in the amount of \$1.5M/year expected for consolidation will not be realized).</li> <li>Look at your economic analysis and state some of the findings (i.e. payback, cost avoidance, annual savings).</li> <li>There is much coordination required for projects that accommodate new equipment (e.g. OPN) and sometimes this equipment costs much more than the facility to house it. This may be a serious impact to your operations and should be addressed (e.g. Equipment at a cost of \$25M will be delivered and there will be no facility in which to house it).</li> </ol> </div> <p>ADDITIONAL: Economic Alternatives Considered:</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Additional: Economic Alternatives Considered (General Notes):</b> The economic justification paragraph must discuss each of the following options:</p> <ul style="list-style-type: none"> <li><b>Status Quo:</b> What is wrong with the operation today? This alternative should not normally include cost for renovations or upgrades, only current operational and maintenance expenses.</li> <li><b>Rehabilitation/Modernization/Alteration/Conversion:</b> Are there facilities that can fulfill the requirement when modernized or renovated? If so, what is the investment cost? Address alternatives that include a combination of renovation and new construction (i.e. building addition). Rehabilitation can include those projects executed in accordance with NHPA requirements.</li> <li><b>Leasing (or Use of Private or Public Sector Capacity):</b> Is leasing an option? How about other DOD facilities nearby? Can the function be contracted out?</li> <li><b>New Construction:</b> Is new construction the only viable alternative? If there are other options, an economic analysis is required.</li> <li><b>Analysis Results:</b> Bottom line - Is the proposed project the best economic alternative?</li> </ul> <p>Tips:</p> <ol style="list-style-type: none"> <li>In many cases, it will not be possible to identify a viable alternative for each of the above options. An option which does not have a viable alternative may be eliminated from further consideration. However, the option still must be addressed and specific reasons for eliminating the option must be stated. These reasons will not be considered valid unless they meet one of the elimination criteria explained on the shaded block with each alternative discussed below.</li> <li>If there are two or more alternatives, then the recommended alternative should be supported by an economic analysis, and the results of this analysis must be addressed. An economic analysis for all the projects is required (even for projects with costs below \$2M).</li> <li>There are cases where you may have more than one option under one of these alternatives (especially for rehab/modernization and leasing) address them individually.</li> <li>Use alternatives that are reasonable and defensible. Cite references on how the numbers used were generated.</li> </ol> </div>		

1. Component NAVY	<b>FY 2003 MILITARY CONSTRUCTION PROGRAM</b>	2. Date
3. Installation and Location/UIC: N62588 NAVAL SUPPORT ACTIVITY NAPLES, ITALY		
4. Project Title AIR PASSENGER TERMINAL		7. Project Number P-196
<p>(...continued)</p> <p>a. Status Quo: This is not a viable alternative. Present operations will continue dysfunction of operations and life safety threats. However, for comparison purposes this alternative was evaluated and found to have a net present value cost of \$35,369K.</p> <p>b. Renovation/Modernization: This alternative includes all necessary upgrades to the existing facility (Building #405), including repairs, alterations and a new addition. Although technically feasible, renovating the existing building will not correct several problems, since the renovation would only partially alleviate the operational difficulties, and the cost of seismic upgrades would cost as much as new construction. We evaluated this alternative with its shortcomings and it has a net present value cost of \$36,405K.</p> <p>c. Lease: This is a feasible alternative, however, it has a higher cost than new construction. This alternative considers the leasing of space that needs to be modified for the intended use of an air passenger terminal outside the Capodichino compound while allowing demolition of the existing building. Space for lease that could be modified for this purpose was found at a cost of \$650K/year. However, renovation costs were estimated at \$2M. This alternative increases operational inefficiencies since traveling personnel will have to be transported to this remote location away from the runway at an estimated cost of \$1.6M/year. It also presents security difficulties. Net present value cost for this alternative is \$36,405K.</p>		

**Status Quo**  
The status quo may be eliminated as an option for the following types of projects:

- Projects which support a new or expanded mission and there are no existing facilities which will satisfy the requirement.
- Projects which correct fire, safety or health deficiencies.
- Projects which correct pollution and environmental problems.
- Projects which support a forced relocation and there are no existing facilities which will satisfy the requirement.

**Renovation/Modernization:**  
Describe one or more viable alternatives for this option, if possible. Rehabilitation, modernization, alteration, or conversion of an existing facility may be eliminated under the following circumstances:

- There are no available facilities which can be modified to provide satisfactory support for the requirement. This needs a clear explanation.
- A deficiency cannot be corrected for less than 75% of the cost of new construction.
- A needed change or correction is an engineering impossibility.

**Leasing (or Use of Private Sector Capacity).**  
Leasing is being looked at more and more as a viable option. You need to look outside of your fence and document what is available. A leasing alternative should always be considered for any proposed facility which will be used for the following purposes:

- Administrative office space.
- ADP space
- Storage space (warehouses, tanks, outside storage).
- Classroom space.
- Medical/dental clinic space.
- Laboratory space.
- Light manufacturing space.
- Piers and wharfs.
- Family Housing.
- Bachelor Quarters.
- Parking
- Child Development Centers.
- Dining Facilities.

If a documented market survey indicates that the desired space is unavailable, then this option may be eliminated.

Note #1 - In general, location will not be accepted as a valid reason to eliminate a leasing alternative unless a case is established as to how this would contribute to a degradation of mission, security, safety, good business practice, excessive travel time, excessive cost, etc.

Note #2 - In general, security will not be accepted as valid reason to eliminate a leasing alternative because the private sector is capable of providing highly secure space.

1. Component NAVY	<b>FY 2003 MILITARY CONSTRUCTION PROGRAM</b>	2. Date
3. Installation and Location/UIC: N62588 NAVAL SUPPORT ACTIVITY NAPLES, ITALY		
4. Project Title AIR PASSENGER TERMINAL		7. Project Number P-196
<p>(...continued)</p> <p>d. New Construction: This is the preferred alternative, it calls for construction of an efficient air passenger terminal next to the runway and includes demolition of the existing building as agreed to with the Italian Government. New construction has the lowest Net Present Value cost at \$31,843K.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px; float: right; width: 30%;"> <b>New Construction</b>          Generally, new construction is always an alternative. However, new construction may be eliminated as an alternative if the cost of alteration, conversion, rehabilitation, or modernization is less than 75% of the new construction cost.       </div> <p>e. Analysis Results: Net present value calculations indicate that new construction has the lowest life-cycle cost among the viable alternatives as discussed in the Economic Analysis provided as an attachment. It also shows an attractive payback of 5 years.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px; float: right; width: 30%;"> <b>Analysis Results:</b>          Provide a brief summary of the results of your analysis. Generally, it is useful to cite statistics from your detailed economic analysis such as: net present value, payback periods, savings-to-investment ratios, annual savings, etc. Exercise some caution if savings are described. Make sure they are real and that you can live without those funds after the project is completed.       </div>		
<p>12. Supplemental Data:</p> <p>Site Approval:          (X) Yes, obtained date: <u>8/00</u>          ( ) No, expected approval date: _____</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px; float: right; width: 30%;"> <b>Site Approval</b>          Any siting or special approvals (i.e. explosive safety) . Address any siting problems if necessary. **NEPA Documentation**  
Provide information about environmental approvals required. Indicate status ( in-process or completed FONSI).

**Mitigation Issues**  
Include brief discussion of known mitigation requirements.

**Environmental Cleanup**  
Include discussion of known soil conditions. If significant amount of environmental cleanup is required, discuss why DERA funding should not be used and why an alternative site was not selected.

**Technical Operating Manuals** (also referred as Operations and Maintenance Support Information or OMSI)  
For a typical facility, the manuals cover as a minimum the fire protection system, HVAC and direct digital control (DDC) systems. Generally, projects such as paving, dredging and land acquisition do not require manuals. See MIL-HDBK-1010 Section 2 for additional information or call Mr. Paul DaVia, LANTDIV Code1614, phone: 757-322-4647 (DSN 262), email: DaviaPC@efdlant.navy.mil

**Utilities and Site Improvements:**  
For DD-1391 + provide the items and the best information available. For PCE provide more refined cost. Consider user hours of operation when designing systems (will systems be in use constantly or is there down-time?)

**Electrical**

- Consider adequacy of utility and infrastructure support necessary such as primary electrical distribution, transformers or substations, area lighting and communications.
- Consider system redundancy (UPS, etc.).
- Lightning protection.

**Mechanical**

- Consider adequacy of mechanical infrastructure necessary such as chilled water, steam, gas, and water distribution, fire protection water, sanitary sewer, and fuel storage.

**Pavement**

- Consider adequacy of asphalt or concrete roads, parking, walkways or aprons.

**Site Improvements**

- Consider site-work required such as earthwork, topsoil, seed, landscaping, irrigation, storm drainage and water ponds.

**Demolition**

- Provide BUILDING #'s of buildings / structures to be demolished.
- Indicate the AREA (m2) to be demolished.
